

Near Infrared Imaging

Vein-Eye® Carry

The Vein-Eye® Carry provides real-time video of sub-dermal veins. **The video is full high definition (1920 X 1080) and can find veins in every patient, even the sickest.** Used at the City University of New York (CUNY) nursing school.

“Vein visualization technology improved the first stick success rate by 92% in 129 pediatric patients.” - *Pediatric Emergency Care Journal*

Care delays occur in 25% of all patients due to the inability to establish vascular access. - *NIH*

The Vein-Eye Carry only weighs five (5) lbs. and can be carried into the home, throughout the hospital, and used in an ambulance.

Used exclusively in Ukraine to treat wounded soldiers and civilians on the front lines and will soon be used exclusively in Ukraine's largest school of medicine.

The Vein-Eye® Carry is an FDA registered Class 1 medical device: #3002736133. Assembled in the USA. **McKesson Medical product number: 1233501**
