

# A multi-channel pump bringing versatility to drug infusion technology

- **Three independent fluid delivery systems**

All in one device weighing just over five pounds

- **Small instrument, huge benefits**

Ideal for surgery, oncology, and is an excellent transport instrument

- **Advanced dose rate calculator**

Includes customized drug library

- **Six selectable device types**

Specifically tailors parameters to match the clinical needs of the patient

- **Unique clamping system**

Allows pump attachment virtually anywhere

- **Disposable half-set**

Makes patient turnover easier. Adapts to most manufacturers' tubing

## MedSystem III® Infusion Pump Specifications

### Administration sets

The MedSystem III® infusion pump is designed for use with our dedicated MedSystem III® pump administration sets.

The MedSystem III® infusion pump dedicated sets provide a wide variety of needleless and standard IV sets, each featuring free-flow protection.

|                      |                                                                                             |
|----------------------|---------------------------------------------------------------------------------------------|
| Flow rate range      | 0.1 to 999 mL/hr                                                                            |
| Volume to be infused | 0.1 to 9999 mL                                                                              |
| KVO flow rate        | 0.1 to 20.0 mL/hr                                                                           |
| Dimensions           | Width 6.0 in.<br>Height 7.9 in.<br>Depth 2.1 in.<br>Weight 5.1 lbs.                         |
| Internal battery     | Main – Rechargeable NiCad Battery Pack<br>Memory backup – Non rechargeable lithium          |
