Positioning patients properly in the operating room (OR) is critical to providing the best care possible and protecting against complications such as pressure ulcers and nerve damage. Selecting the appropriate positioning devices for each procedure is a collaborative process for the perioperative registered nurse, surgeon and anesthesia provider.

Cardinal Health™

DEVON™ Foam Positioners

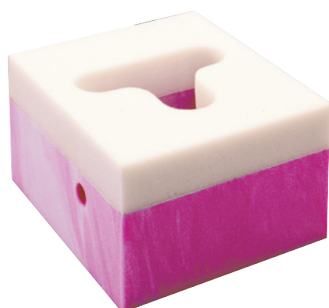

Cardinal Health™ DEVON™ Foam Positioners are made of a high-density, raspberry swirl polyurethane foam — 1.35 pounds per cubic foot for optimal support. All products are single patient use, non-sterile, not made from natural rubber latex and meet California Technical Bulletin 117-2013 regarding fire safety standards.

Supine Lithotomy Trendelenburg Positioning Kit

Whether you are performing a robotic, gynecological, urological or laparoscopic procedure, the **Cardinal Health™ DEVON™ Supine Lithotomy Trendelenburg Positioning Kit (SLT Kit)** has you covered. Its dual foam system (white memory foam with blueberry-swirl high-density foam) conforms to the patient and provides pressure distribution*. The foam pad graduates in height from 2 inches at the sacrum to 3.5 inches at the shoulders, delivering additional support and pressure relief*. The innovative pass-through sheet maximizes the patient's contact with the foam and the pad's contact with the table while also facilitating complete arm support. Customize the pad for each procedure type with the perforated perineal pullout.

Supine Lithotomy Trendelenburg Positioning Kit

Rated for patients up to 450 pounds

Includes:

- 1 table pad (30 L x 20 W in.) with integrated pass-through sheet
- 1 chest foam, convoluted (30 L x 6 W in.)
- 1 body strap, disposable (60 L x 4 W in.)
