

Characteristics

COATS® barrier technology is a totally powder free, all-natural physical barrier between the glove surface and the wearer's skin, utilizing the anti-irritant and anti-inflammatory properties of colloidal oatmeal. In our COATS® gloves, the colloidal oatmeal barrier not only shields the skin surface, it also creates a moisturizing and pH balancing environment that helps dry, damaged skin to repair itself. And healthy skin is the body's best defense against infection. What a naturally great idea!

**Exam Glove
Non-Sterile**

**NitriDerm®

L	125302	200 Gloves/box, 10 boxes/case	
XL	125352	200 Gloves/box, 10 boxes/case	

COATS® - Colloidal Oatmeal Active Therapeutic System

- A glove that can help protect you and your skin.

- COATS® is an innovative new barrier coating comprised of all natural colloidal oatmeal USP which is an FDA recognized skin protectant drug.
- Applied to the don side of the glove through a proprietary process, COATS® is a powder-free process.
- COATS® technology reduces irritation and hydration dermatitis by creating a physical barrier between glove film and skin; absorbing perspiration, urea, and salt excretions; providing anti-irritant and anti-inflammatory benefits; effectively pH buffering the skin; and naturally moisturizing the surface of the skin.
