EASYPOINT®

retractable needle

— EASY TO USE —

- minimal change in injection technique
- allows for single-handed activation
- **clinician's hands and fingers remain behind the exposed sharp** at all times

Attach EasyPoint needle to any luer lock or luer slip syringe. Administer medication according to institutional policy.

Apply pressure to the color-coded tab and the safety chamber using a squeezing motion, allowing the needle to automatically retract into the safety chamber. **This device is designed for activation before or after removing the needle from the patient.**

Dispose in an appropriate sharps container per protocol of institution.
