

antimicrobial technology

Patented* Antimicrobial Powder Coating uses sustainable silver ions to inhibit the growth and transmission of harmful microbes on treated surfaces.

*Patents US6093407(A), US643241 (B1)

FALL PREVENTION

Safe patient handling and reducing costs associated with inpatient falls are primary concerns for healthcare providers

- ✔ **“Live” Handrails**
Advanced technology allows the patient to hold onto handrails for stability while the scale accurately calculates weight
- ✔ **Low Profile Platform** requires only minimal step up, offering the patient a more comfortable and stable weighing experience

**LIVE HANDRAILS
FOR PATIENT STABILITY**

WORKFLOW EFFICIENCY

Simple to use and intuitive scales allow caregivers to focus on patients instead of complicated equipment

- ✔ **On-Screen Help Menu**
Guides users through operating functions and provides easy access to multiple settings
- ✔ **Interactive Display**
High contrast color screen provides a user-friendly interface
- ✔ **EMR Capable**
Scale has the ability to interface with a PC or other electronic device via USB or optional Pelstar wireless technology
- ✔ **Everlock[®] (patent pending)**
Option that allows users to permanently lock the scale in either LB or KG to improve safety

INFECTION PREVENTION

Reducing patient's risk against Health-care Associated Infections is a major challenge for medical facilities

- ✔ **Antimicrobial* Powder Coating**
The silver ionic technology suppresses the growth of bacteria and helps protect against cross-contamination

DURABILITY

Facilities require a product to withstand frequent use, movement, and disinfection

- ✔ **Convenient Transport Handle** allows the user to easily move the scale to where it is needed in the facility
- ✔ **Rugged Scuff-Proof Wheels** enable smooth and easy portability
