iWALK^{2.0}

THE NEXT GENERATION OF HANDS-FREE MOBILITY IS HERE!

"As a General Surgeon, I spend my working hours standing at an operating table, impossible with crutches...and have been on my iWALKFREE...for nearly six months. This device is one of the most fantastic, original, insightful and important medical innovations of recent years and has allowed me to maintain my job, my family, and my sanity despite a nasty injury."
—Richard W. Shallman MD. WA.

How do you improve on the world's best selling hands-free crutch?

- Lateral offset, catamaran rocker tread, self-stabilizing foot makes balancing easy and intuitive. Rotates 180° for right or left leg use.
- Proprietary glass reinforced thermoplastic, paired with engineered forms, keeps the device light and sturdy.

- Comfortable woven straps have fabric covered foam pads, easy infinite adjustment and quick release buckles.
- Donning and doffing takes seconds.

- Integral handle makes leaning easier and allows short trips without strapping in.
- Triangulated alloy tube frame enhances user stability.

- Ergonomic knee platform shape provides greater comfort and control.
- Independent upper and lower leg height adjustments makes fitment fast and easy.

- Rigid, independently adjustable thigh cradles provide enhanced stability and simple tool-free size adjustments.

OTHER BENEFITS:

- Easy to learn - competency in minutes - easier to learn than conventional crutches
- Tool-free adjustments take seconds
- Eliminates pain and fatigue of conventional crutches
- Boosts user independence, morale and confidence
- Ability to perform common tasks that are impossible with standard crutches
- Fully adjustable - Single SKU fits users 4'10" to 6'6"
 - Adapts to left or right leg in seconds

PROFESSIONAL:

- Professional fitting not required - user can self-fit in five minutes
- Fully supported - easy to follow instructions and video tutorials are provided
- Economical - competitively priced
- Retail friendly - full color carton is 16" x 8" x 6" (slightly larger than a shoebox)

User Height Range: 4'10" - 6'6"
Weight Limit: 275 lb
Crutch Weight: 6.1 lb
on-off Time: 10-15 seconds
