

How to Choose the Right Shower Chair

What is the purpose of a shower chair?

Shower chairs provide assistance to those who need to sit while bathing. These chairs increase safety for individuals who are at risk for slips, trips and falls.

What kind of shower chair do I need?

Types of Shower Chairs

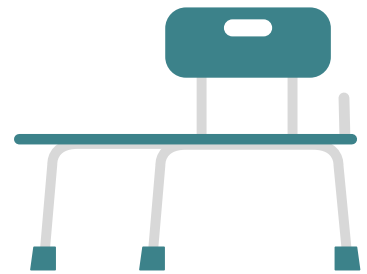

There are different types of shower chairs to aid people with varying levels of mobility. Choosing the right one will make all the difference.

Bath Stool

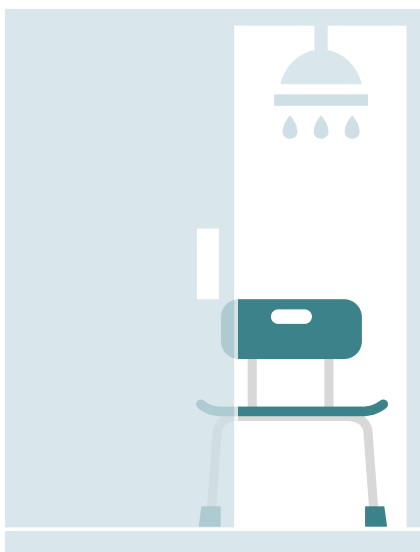

Shower Chair

Transfer Bench

1: Choose Based on Environment

Your bathroom environment will determine what style shower chair is right for you.

Walk-In Shower

Bath Stool | Shower Chair

Make sure product will fit comfortably.

If other family members share the bathroom, consider choosing an item that can easily be removed from the space.

Bathtub

**Bath Stool | Shower Chair**

Measure the width of the base of the tub (from the inside).

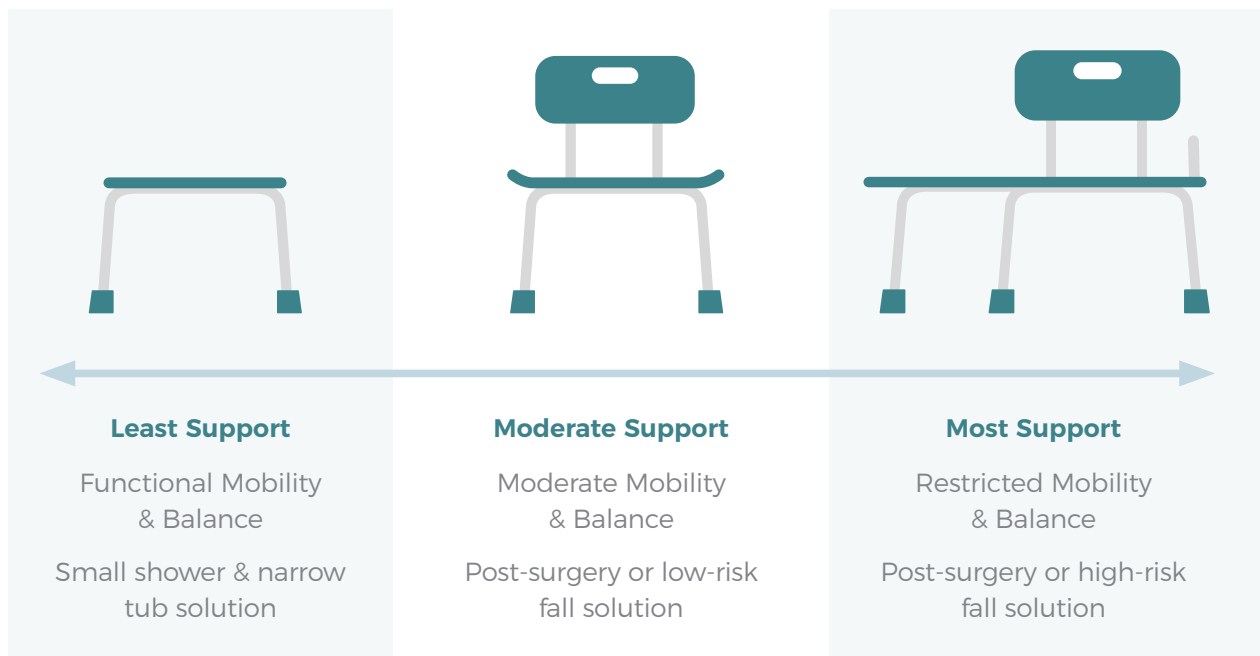

For proper fit, ensure the outside leg dimensions of the product are smaller than the base width of the tub.

Transfer Bench

Ensure there is enough room outside the tub for safe transfer.

Measure the distance from the top of tub to the floor. This measurement must be more than the product seat height specifications to ensure proper clearance.

2: Choose Based on Mobility & Support

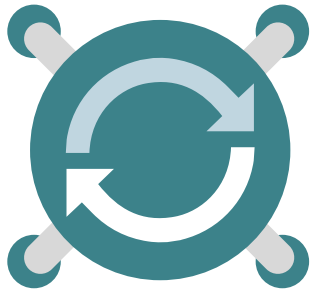

3: Choose Based on Weight Capacity

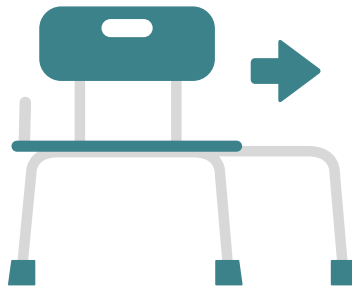

The weight capacity of standard shower chairs ranges from 250 to 400 pounds with additional bariatric models available.

4: Choose a Standard or Specialty Model

Rotating Seat

Sliding Seat

Shower chairs with a rotating or sliding feature allow for easier transfer and aid in preventing friction and shearing injuries.

Helpful Hints

Bath Stools & Shower Chairs

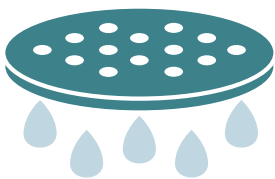

Adjust the height to ensure your feet are flat on the floor.

Make sure all legs are at the same height.

Transfer Benches

Be aware of the difference between the floor of your bathroom and the floor of the tub when adjusting legs.

Additional Features to Choose From

**Water Drainage
Holes**

Contoured Seat

**Padded Seat
and Backrest**

Armrests

Safety Considerations

- 1** Ensure the leg extensions are securely locked into place.
- 2** Be sure all leg extensions are touching the floor.
- 3** Rubber tips aid in preventing slipping upon entry and exit of the tub or shower.

Additional Bathroom Safety Items

Shower Sprays

Pair a shower spray with a shower chair to aid in cleansing. Some products feature a shower spray cutout to allow for ease of access.
