# Rapport™

Drug-free treatment for erectile dysfunction

Rapport™ vacuum therapy devices have been developed as user-friendly, effective treatments for erectile dysfunction. The advantages of using Rapport include:

- A non-drug therapy, which can be used with other medications.[1]
- Applied externally and therefore non-invasive.
- An erection can be achieved within minutes and therefore spontaneity for intercourse is not compromised.[1]

## Rapport™ Classic

**Rapport™ Classic** is a unique vacuum therapy system developed as an effective treatment for erectile problems. This vacuum therapy system creates a vacuum around the penis which quickly produces a satisfactory erection by drawing blood into the penis. The pump is then removed leaving the constriction ring at the base of the penis.

**The Rapport™ Classic system consists of:**

- 1 clear plastic vacuum tube
- 1 hand pump with a pressure relief valve
- 5 sizes of penile rings
- 2 sizes of transfer sleeve(s)
- 1 loading cone
- A tube of water-soluble lubricating jelly
- A full set of patient instructions
- All the above items are supplied in a discreet carrying case

## Rapport™ Rings

The **Rapport™ Rings** loading system is ideal for men who need help to maintain an erection. The constriction ring, placed at the base of the penis, will maintain an erection until it is removed.

**Rapport™ Rings system consists of:**

- 2 sizes of transfer sleeve(s)
- 1 loading cone
- 5 sizes of penile rings
- A tube of water-soluble lubricating jelly
- A full set of patient instructions
