

The **Nitro[®] Neuro[™] Upright Walker** delivers **advanced mobility support and safety features for customers who need additional support**, such as those with Parkinson's disease and other neuroambulatory disorders. With its innovative reverse braking system and adjustable resistance control, **this upright walker helps provide superior stability while supporting a broader range of users.**

Ideal for patients who need additional mobility support, such as those with:

- Parkinson Disease
- Multiple Sclerosis
- Traumatic Brain Injury
- Stroke
- Cerebral Palsy
- General Weakness

Benefits & Features

Controlled Mobility Support

Unique reverse braking system automatically engages when hands release the brakes to **prevent uncontrolled rolling, giving users more control.** Easy-to-adjust braking resistance knob customizes roll speed and resistance **allowing users to walk at a controlled pace based on individual ability.**

Comfort You Can Rely On

The easy-to-grip brake handles **provide intuitive, responsive control for confident everyday use.** Thick, height-adjustable arm pads and a generous 20" seat support comfort during rest and walking.

Confidence When Standing & Transferring

Integrated sit-to-stand handles **offer stable support to help users safely rise from a seated position and transition** with greater confidence.

Everyday Convenience, Personalized

A large two-position storage bag and compatibility with the existing Nitro cup holder **keep everyday essentials close at hand** and give users the flexibility to personalize their walker for how they move through the day.

Nitro[®] Neuro[™] Upright Walker is a mobility aid and does not diagnose, treat, cure, or prevent any medical condition. References to medical conditions are for context only and not therapeutic claims.
