

MICRO-TOUCH[®] Nitrile E.P.

P e r f o r m a n c e S e r i e s

Durable design with an extended cuff for high-risk protection within healthcare environments

This non-sterile glove has an extended cuff provides extra protection when healthcare providers are exposed to chemotherapy agents, bodily fluids or blood-borne pathogens in high-risk clinical settings. It provides excellent chemical and puncture resistance and is textured for better grip in wet and dry procedures.

KEY FEATURES AND BENEFITS:

- Extended 12" cuff provides added protection over the wrist and forearm
- Effective barrier protection against punctures and a wide range of chemicals
- Protects from latex Type I allergy
- Tested for use with chemotherapy drugs*

* See product packaging or contact Ansell Customer Service for specific chemotherapy drug permeation times and recommendations

WARNING: No glove completely protects against all chemicals. Users should test the suitability of this product against the specific chemicals and environment where used.

** This product is only available in North America.

Recommended For

- Tested for use with chemotherapy drugs
- Extra protection over the wrist and arm
- Protection from Type I latex allergy in HCW's or patients
- Sustained, high-risk examination procedures

FEATURED TECHNOLOGIES

MICRO-TOUCH[®] Everyday, Everywhere Protection

MICRO-TOUCH[®] premium medical examination gloves are scientifically designed to complement every need of medical professionals. Sophisticated design features include Ansell ergonomic technologies that ensure comfort during extended procedures, wet grip innovations that prevent harmful mishandling, and micro-thin films for maximum sensitivity. Caregivers who are fully prepared and comfortably protected by versatile MICRO-TOUCH styles have the peace of mind to focus on what matters most: the health and protection of themselves and their patients.

MICRO-TOUCH[®] Nitrile E.P.

Performance Series
